

A close-up photograph of a person's legs in a desert landscape. The person is wearing dark grey Columbia socks and dark grey Columbia sneakers with a bright orange sole. The person is standing on a large, reddish-brown rock. The background shows a desert landscape with more rocks and a clear sky.

TELLURIX™ TITANIUM™ OUTDRY™

Conquer rugged terrain with the Tellurix, designed for stability, protection, and all-day comfort. A grippy VIBRAM outsole and a technical, supportive upper provide the traction and durability needed for any adventure.

UPPER

Technical mesh upper with no-sew overlays for added durability and support.

NAVIC FIT SYSTEM™ delivers a natural midfoot lock down.

OutDry™ waterproof breathable construction.

MIDSOLE

Omni-Max™ Plus system: An engineered TECHLITE+™ midsole cradles the heel for optimal balance while the deflection domes in the forefoot and heel absorb impact, working together to reduce stress on the foot.

Deep flex grooves in the forefoot offer enhanced motion allowing for a more efficient stride.

OUTSOLE

Partnering with industry leading traction experts VIBRAM® to create advanced traction by maximizing surface contact, creating multi-directional lugs, and providing necessary mud release.

VIBRAM® Megagrip compound with 4.5mm outsole lug height.

CASTBACK™ TC PFG™

Premium and performance built to wear well on and off the boat.

UPPER

Nubuck leather and mesh upper.

Blood 'n Guts™ water and stain resistant treatment.

Rich mix of premium materials for an elevated look and feel.

Collapsible heel for an easy-on comfortable experience.

MIDSOLE

Omni-Max™ Plus system: An engineered TECHLITE+™ midsole cradles the heel for optimal balance while the deflection domes in the forefoot and heel absorb impact, working together to reduce stress on the foot.

Deep flex grooves in the forefoot offer enhanced motion allowing for a more efficient stride.

OUTSOLE

Omni-GRIP™ non-marking traction rubber.

Grippy razor siping on the rubber outsole for the best on-boat performance.

CASTBACK™ PFG

Inspired by the shape of a pinecone, Omni-Max™ is the ultimate shoe for your outdoor exploration. An engineered underfoot system delivers superior comfort and traction you need to tackle any terrain while providing stability to keep you progressing. Omni-Max™ is made to take on the boat to perform.

UPPER

An all around performance upper with mixed material mesh for breathability.

NAVIC FIT SYSTEM™ delivers a natural midfoot lock down.

Drainage ports for on boat water drainage.

Blood 'n Guts™ water and stain resistant treatment.

MIDSOLE

Omni-Max™: Using a TECHLITE™ midsole, a specially designed heel and midfoot aids in creating a stable platform.

Deflection domes in the forefoot and heel reduce load impact for better comfort and rebound.

Flex grooves in the forefoot provide flexibility and better push off.

OUTSOLE

Grippy razor siping on the rubber outsole for the best on-boat performance.

NOTES

SUSTAINING ACTIVE LIFESTYLES

At Columbia, we invest in initiatives that have a positive impact on the people we reach, the places we touch and the products we make.

EMPOWERING PEOPLE

SUPPORTING OUTDOOR PARTICIPATION, ACCESS, AND STEWARDSHIP

We work with a diverse group of partners to create opportunities for all people to get outside and enjoy the outdoors. Key initiatives include National Park Foundation's Open Outdoors for Kids program, our Collegiate Outdoor Recreation Program, and the Venture Out Project.

SOCIAL RESPONSIBILITY IN OUR SUPPLY CHAIN

We are committed to promoting a safe, fair, and ethical working environment for the people who make our products. To assess our manufacturing partners' compliance with our Standards of Manufacturing Practices (SMP) (our Supplier Code of Conduct) and local labor laws, our internal Corporate Responsibility (CR) specialists perform unannounced audits, as well as use performance data from leading industry assessments, including the International Labour Organization's Better Work Program. Remediation and training are focused on specific areas for improvement, with scorecards reflecting overall performance, management systems, long-term change and commitment to worker well-being.

EMPOWERING PEOPLE IN OUR SUPPLY CHAIN

We support people working in our supply chain by investing in their wellbeing through programs such as HERproject. HERproject empowers women working in global supply chains by delivering workplace training on improving health (HERhealth), financial inclusion (HERfinance), and promoting gender equality (HERrespect) through a peer-to-peer methodology, encouraging participants to build and share new skills with their communities. In 2019, we made a public commitment through the United Nations Foundation to scale women's health and wellbeing programs in our supply chain to impact the lives of 150,000 workers by the end of 2025.

IMPROVING WATER ACCESSIBILITY

We partner with the Planet Water Foundation to help bring clean water to communities within our supply chain. Since 2016, we have built 36 AquaTower water filtration systems in five countries. Through our ongoing partnership with Planet Water Foundation, we have set a new goal to provide access to clean drinking water to 100,000 people by 2028.

INSPIRING EMPLOYEES AND POSITIVELY IMPACTING COMMUNITIES

We support our employees, customers, and communities around the world through a variety of volunteer initiatives and donations. All eligible employees have 16 paid hours per year for volunteer activities. Additionally, our corporate matching program allows eligible employees to double their monetary donations to charitable causes up to \$1000 per employee per year.

We also have seven Employee Resource Networks (ERN) to empower our employees to address diversity, equity, and inclusion issues important to our company. ERNs include:

- Women's Leadership Initiative
- Pride
- Black Employee Network + Friends
- Vamos Unidos
- Coalition of Asian and Pacific Islander Employees
- Veterans Employee Resource Group
- Our Trail

SUSTAINING PLACES

CONSERVATION PARTNERS

We are working with Conservation International and the Ocean Conservancy to forward resource preservation conservation globally.

SUSTAINABLE MANUFACTURING

Our Sustainable Manufacturing Program focuses on monitoring and improving the environmental performance of supply chain manufacturing partners. We use the Higg FEM (Facility Environmental Module), managed by the Sustainable Apparel Coalition, and our Climate Progress Reporting Tool (CPRT) to assess environmental performance in our supply chain. With the CPRT, and in collaboration with our manufacturing partners, we continue to gain greater accuracy in measuring our emissions and other environmental impacts to drive impact.

INNOVATING PRODUCTS

ENERGY USE

We use energy efficiency measures and renewable energy to reduce our carbon footprint.

- A 100 KW grid-tied solar electric system consisting of 570 photovoltaic (PV) panels is installed on the roof of our Headquarters building.
- Our Portland and Seattle retail stores are LEED certified and our global facilities follow green office best practices.

LEATHER WORKING GROUP MEMBER

Columbia Sportswear Company is committed to supporting responsible leather manufacturing across the globe and that is why we are proud members of the Leather Working Group (LWG).

CHEMICALS MANAGEMENT POLICY

Chemicals are used throughout our high-performance product creation process. It is a complex area of great opportunity. Our Chemicals Management Policy guides our supply chain partners towards industry best practices that support global chemical compliance, and the reduction of impacts on workers and the environment.

PRODUCT COMPLIANCE

We strive to make products that are safe for all who come into contact with them; workers who make them, consumers who use them, and the environment. We abide by global product safety regulations and maintain a Restricted Substances List (RSL). It goes beyond basic regulatory compliance with global standards and laws and includes a testing program to confirm our products meeting our RSL and all applicable standards and laws.

PREFERRED MATERIALS

We work to reduce our environmental impact from material inputs by increasing the use of materials with preferred attributes (e.g. recycled content, organic content, waterless dye, etc.) in our material portfolio. For example, we are reducing our water footprint by using materials dyed without water

and working with manufacturing partners to clean and recycle water. We are also increasing the amount of recycled content in our material portfolio and in our packaging materials to avoid emissions produced in the manufacturing of new materials, and to keep materials in use longer through recycling.

Since Fall 2016, all of our down is independently certified to The Responsible Down Standard (RDS) by Control Union (License Number: CU 848416). The RDS requires animal welfare practices to be in place at the duck and goose farms in the down and feather supply chain. Products certified to the RDS contain down or feathers from farms certified to animal welfare requirements. The purchase of RDS certified products demonstrates demand for better animal welfare practices in the down and feather supply chain.
