BUSY LIVING

JET PILOT 35 YEARS 1986-2021

It's our 35th year of business, and it's by no accident we lasted this long, constant adaptation and development in our brand has seen us stay, and continue to be relevant market leaders. This year our marketing is focused on "Busy Living" if anything we learnt during lock down not to take for granted our freedom, so let's get out there and make the most of every Day, LIVE RIDE ESCAPE.

CONE HEAD TECHNOLOGY™

The most advanced helmet technology in the World

In a crash, the impact force pushing towards the head causes the cones to compress which creates lateral forces spreading sideways through the higher density outer foam layer. Impact energy/force is absorbed by this lateral motion. At the same time, the head is travelling in the opposite direction, compressing the bases of the lower density cones and slowing the accelerating head.

The result is lower G-force experience for your head. The Benefits: A lighter helmet + softer protective shock absorbing foam closer to your head.

PERFORATED AEROPRENE

Internal has been ergonomically designed to keep you head safe and in advanced comfort by using Perforated Aeroprene liner for fast water release and draining and reduced drying time.
